

STATEMENT OF THE SUBSTANCE OF THE INTERVIEW

The telephonic interview with the examiner on April 27, 2010 is acknowledged with thanks. The prior art Patent Application Publication US 2001/0034015 A1 published Oct. 25, 2001 to Raichur et al. was discussed. It was submitted that claim 1 is different from the invention disclosed by Raichur in that in Raichur, filtering occurs before the message is sent to an expert, whereas in claim 1, the filtering occurs at each recipient and if the message does not pass the filter, it is not seen by the recipient. It was discussed that the claims be amended to make clear that all published messages go to the recipients, and that each recipient filters the messages such that only messages passing the filter are seen by the recipient. No agreement was reached. The examiner suggested that any amendments be referenced to language in the specification.
